BEVERLY FARMS Hanada li

Dear Sir,

I am truly sorry to hear  
of your illness - but I hope that you  
will be perfectly soon by the time this  
reaches you and therefore will say  
nothing. I cannot locate having  
received your Recitation and have  
been to hear a letter from you and  
answered. I do not know when I do say  
but I do not dare swear to what may  
have happened in the heat of work.

I did write him messages for Shurtliff and  
have an interesting advertising book, "An  
Illustration of the King English". What  
has taught me some history that  
I had not hitherto learned but happily it is not worth  
enough to interest Mr. Cram & Fair, Alton.  
Parker shows himself interested in  
the American Encyclopedia books -  
but destined to be of all that he writes  
at Ross. Paul Parker's - a very  
handsome popular work. I have  
announced my writing to do and  
slightly bored myself with Parker.

and English - and then on how  
a book on the Roman law shall  
be published up which may  
of course interest. A rare lady, an  
occasional intelligent gentle-  
man Davies apud Bodleian at work;  
there are big announcements - the  
book is made difficult by an  
so I think from what I can tell  
postponed from which he has  
brought back some Latin. He had many  
books & works

in a suit by Missouri or Illinois to  
stop Chicago from draining into the  
Mississippi, after 350 miles within  
State, into the Mississippi. They began  
this and, who gradually grew, came  
against each other in a divorce case  
which stirred up her mother's bad  
memories. In the main it was a pretty peaceful  
year. Do you remember us most kindly  
to your wife and Douglin. how  
we returned to my poor old study  
and now to divorce between the  
two states.

My Dear Judge

I am truly sorry to hear of your illness, but I infer that you will be perfectly well by the time this reaches you and therefore will say no more. I cannot recall having received your second edition and I never mean to leave a letter from you un-answered. I do not think I have done so but I do not dare swear to what may have happened in the heat of work & worry. I did work like blazes for 8 months and now am idling and reading books. At this moment it is 'The King's English' which has taught me some mistakes I have made but happily itself is not well enough written to cause despair. A little earlier I was much interested in some American Sociological books - e.g. Lester Ward (all that he writes) and Ross 'Social Controls' - a mighty sharp little popular work. I have amused myself with some law and slightly bored myself with Rabelais and Euripides - and I have on hand a book on the Roman Law which Fred Pollock cracks up which I doubt if I shall attack. A rare lady, an occasional intelligent youth - no dinners after the many at work - these are my amusements. The wheel is made difficult by automobiles, so I don't go much further than the post office from which I have just brought back your letter. We had some [piece torn out of bottom of page] that I wrote in a suit by Missouris vs Illinois to stop Chicago from draining into the Ill. river and thence, after 350 miles within the State, into the Mississippi. My colleague White and I, who generally agree, ran against each other in a divorce case which stirred up his monkies - but in the main it was a pretty peaceful year. Do remember me most kindly to your wife and daughter. Now I will return to my books and study once more how to distinguish between which and that. [piece torn from page]

Kanada Li

*her Dr. Jez*

I am truly sorry to hear  
of your illness - but I hope that you  
will be perfectly well by the time this  
reaches you at Kanada without  
hurts. I cannot locate having  
seen your description and have  
tried to send a letter from you in a  
answering. I do not know when I may  
be done or when to write my  
husband is in heat of work.

I did work like crazy for Shurtliff and  
have an interest in reading books, like  
this moment it's "The King English" which  
has taught me some history than  
I had but hopefully it's not work  
enough written to have a fair, little  
earlier I was much interested in  
the American Society for free books -  
Dr Lester Ward ~~of~~ all that he wrote  
and Ross' "Social Control" - a mighty  
thump like popular work. Then  
announced myself with some care and  
slightly bored myself with Rabbinic

at Enfield - and have  
a book on the Roman law still.  
Dr Powell cracks up which does  
not shall attack. A dark hair, an  
occasional intelligent youth -  
he dives after Drury at work;  
then on his amusements - the  
black is made difficult by an ~~turning~~  
so it must go much faster than the  
potopic for which he has but  
one set back even later. He had the

best I wrote

in a Suit by Missouri vs Illinois to  
Stop Chicago from Draining into the St.  
River and then, after 350 miles within the  
State, into the Mississippi. Roy Chapman  
Whitcomb, who generally goes down  
against each other in a divorce case,  
which stirs up his workers, but  
in this case it was a pretty peaceful  
year. Do you remember us most kindly  
to your wife and Douglin. how  
will return to my book and study  
over now at difference between the  
and that -
