30th Ret. Patterson & Powell's 21st settled

12^{mo} Horse died was killed. The
knee joint was ulcerat. & the periosteum
of fore arm was also thickened & inflamed
In this case the horse was kicked on
the forearm just at the joint. the
animal walked for 2 days & the
cut was small & apparently not serious
on the 3rd day she was unable to walk
& could not put it to the ground
& great difficulty in walking & could
not lay down. There was a great
discharge from the wound. & very
great swelling - the symptoms
pointing to injury of the joint
were swelling for 2 days then the
pain being so great as to prevent
the animal from placing the limb
& great discharge with a cracking
sensation or noise on moving the limb
with very great pain & fear of
moving it -
