2. Royal College of Surgeons of England - certificate of the Court of Examiners that John William Hadden, V.D. Land, had been examined and admitted to membership. Signed by the President, Vice-President and 6 others.
(Certificate No. 5185) 2 May 1856
(paper, doc. engraved heading)
3. Diploma of the degree of Doctor of Medicine granted by the College of James VI, Edinburgh. [Edinburgh University] and power to practise medicine granted to John William Hadden of Tasmania; signed by the Principal (John Lee) and 14 professors and sealed with the 'common seal of the University of Edinburgh or College of James VI King of Scotland'.

Parchment doc. in Latin, with engraved arms of Edinburgh and the Common Seal of the University. 1 August 1856
Seal tag of blue silk and seal (detached) in metal container.
Seal: common seal of University of Edinburgh, red wax, impressed on paper.

Note: Edinburgh University was originally the College of Edinburgh or the Town's College founded in 1583 by the Town Council of Edinburgh under a charter granted by King James VI, 14 April 1583, and was generally known as 'The College of James VI'. It gradually came to be styled University of Edinburgh, but remained under the Town Council until 1858 when it became autonomous. The arms (shown on the seal) granted in 1789, are: Argent (silver) on a saltire azure (blue), between a thistle proper in chief and a castle on a rock sable (black) in base, a book expanded on (gold).

4. Edinburgh Royal Maternity Hospital's certificate that Dr John William Hadden acted as House Surgeon from 15 February 1856 to 2 August 1856, signed by the medical officers.
(paper doc.) 1856

TRANSLATION OF UNIVERSITY OF EDINBURGH M.D. DIPLOMA

We, the Principal and the other professors, of the College of James VI, King of the Scots, which is in Edinburgh, wish to state in this document that John William Hadden of Tasmania, after he pursued a medical course, was recommended to us with distinguished evidence by the Medical Faculty, and that after presenting to the public judgement of the professors his inaugural dissertation 'On Amaurosis' we declare in an oath and in due ceremony, which has been carried out, that he has reached the highest honours in Medicine, the grade, no less, of doctorate. And we declare that the greatest powers in medicine of reading, teaching and practising with peoples everywhere are conceded to him, and all other privileges, immunities and rights which here and elsewhere are accustomed to be conferred on someone who has reached the highest honour of doctorate. Which thing we have most faithfully set down in this document with the common seal of the College appended at Edinburgh the first day of the month of August in the year of human salvation 1856
