

GEOLOGY AND MINERALIZATION
OF THE
CAPE HORN - LYELL COMSTOCK AREA, MT. LYELL

by

GEOFFREY R. GREEN, B.Sc.

Submitted in partial fulfilment of the
requirements for the degree of Bachelor
of Science with Honours.

University of Tasmania

February, 1971

*"... there must be few places in the world
where everything is as simple as at Mt. Lyell."*

J. Bradley, 1957.

FRONTISPIECE

Southern slopes of the Comstock Valley looking east. Prominent outcrop at right is Comstock chert.

List of Figures	iv
List of Tables	v
ABSTRACT	1
1. INTRODUCTION	2
1.1 Nature and Scope of the Study	2
1.2 Procedure	2
1.3 Location and Access	4
1.4 Previous Literature	4
1.5 Nomenclature	6
1.6 Acknowledgements	6
2. STRATIGRAPHY	7
2.1 Cambrian System	7
Mt. Read Volcanics	7
1. Ignimbrites (?) and Minor Siltstones	7
2. Felsitic Ignimbrites (?)	12
3. Intermediate Lithic (?) Tuffs	14
4. Keratophyric Lavas	16
5. Comstock Chert	18
6. Greywacke Conglomerate and Limestones	22
7. Banded Quartz Keratophyric Lapilli Tuffs	25
2.2 Ordovician System	29
Jukes Conglomerate	29
Owen Conglomerate	30
Gordon Limestone	31
2.3 Pleistocene Moraine	31
3. STRUCTURE	32
3.1 Regional Structure	32
3.2 Structure of the Cape Horn Area	33
3.3 Pre-Devonian Movement of the North Lyell Fault	35

4. HYDROTHERMAL ALTERATION AND THE LYELL SCHISTS	39
4.1 Chlorites and Quartz Chlorite Schists	39
4.2 Quartz Sericite Schists	46
4.3 Other Schist Types at Cape Horn	50
4.4 Alteration in the Lithic Tuffs	51
4.5 The Comstock Area	53
4.6 Synthesis	56
5. ORE DEPOSITS	59
5.1 Cape Horn	59
5.2 Lyell Comstock	63
5.3 Ores Associated with the Comstock Chert	69
5.3.1 Chert breccia ore	69
5.3.2 Banded chert ores	71
5.4 Tasman Shaft Ore	73
5.5 Devonian Remobilization	76
5.6 Relationship of Mineralization to Stratigraphy and Alteration	78
6. GEOCHEMISTRY OF ORE DEPOSITION	83
6.1 Cobalt, Nickel and Selenium in Pyrite	83
6.2 Sulphur Isotope Studies	85
6.3 Mode of Ore Formation at Cape Horn	88
6.4 Barium as a Guide to Ore	94
6.5 Mechanism of Ore Formation	95
6.6 Estimate of Conditions of Ore Deposition	96
7. CONCLUSIONS	103
APPENDIX A	105
APPENDIX B	108

LIST OF PLATES

	page
Plate 1 Bent fiamme in ignimbrite (?)	11
2 Frayed termination of fiamme	11
3 Fractured albite phenocryst in ignimbrite (?)	13
4 Warping of foliation in ignimbrite (?)	13
5 Embayed quartz phenocryst and haematite replacement of ferromagnesian in spilitic lava	17
6 Relict oscillatory zoning (?) in albite of quartz keratophyre	17
7 Euhedral apatite in spilite	19
8 Corroded barite grains in chert	19
9 Pyrite and fluorite in chert	21
10 Banded pyrite in chert	21
11 Pyrite bands in chert	24
12 Carbonate and albite in greywacke breccia	24
13 Greywacke-chert breccia with clastic pyrite	26
14 Epidote inclusions in chlorite and fractured quartz phenocrysts in tuff	26
15 Zoned plagioclase in tuff	28
16 Texture of Jukes Conglomerate	28
17 Zonation in haematitic clot of quartz chlorite schist	41
18 Triangular haematite lamellae	41
19 Poikiloblastic chalcopyrite	43
20 Magnetite-haematite-chalcopyrite	43
21 { Regrowth of quartz in quartz chlorite schist	44
22 {	44
23 { Quartz aggregates pseudomorphing feldspar in quartz	45
24 { chlorite schist	45
25 Sutured grain boundaries in quartz	47
26 Embayed quartz grain in schist	47
27 Quartz pressure shadows adjacent to chalcopyrite	49
28 Fractured apatite crystals with sulphides	49
29 Sheared schist with fractured pyrite	52

	page
Plate 30 Carbonate-sericite intergrowth	52
31 Lithic tuff	54
32 Texture of lithic tuffs	54
33 Deformation textures in Cape Horn ore	60
34 Chalcopyrite stringers in quartz	60
35 Pyrite porphyroblasts in chalcopyrite	62
36 Recrystallized pyrite euhedra in quartz	62
37 Gold in quartz	64
38 Deformed molybdenite lamellae	64
39 Relict colloform texture (?) in pyrite	66
40 Betekhtinite-bornite-chalcopyrite intergrowth	66
41 Chalcocite-tromeyerite-bornite-galena-chalcopyrite	68
42 Stromeyerite film on galena	68
43 Digenite veins in bornite	70
44 Sphalerite-chalcopyrite showing mutual boundary texture	70
45 Comstock sulphide lens	74
46 Colloform pyrite in Comstock lens	74
47 Banded Tasman Shaft ore	75
