Papers

Keynote Address		
<i>Address</i>	by A. Dunbavin Butcher	1
Physical Setting and non-biological Resources		
<i>The Physical Setting</i>	by Dr. D.J. Rochford	15
<i>The Scenic Margin</i>	by Dr. J.G. Mosley	29
<i>Minerals from the Ocean</i>	by Dr. Peter J. Cook	39
<i>Oil from the Sea Floor</i>	by B.M. Hopkins	65
Biological Resources and their Utilization		
<i>Fisheries Management with particular reference to commercially exploited stocks around Tasmania</i>		
	by A.J. Harrison	81
<i>Farming the Sea</i>	by Dr. Trevor G. Dix	93
<i>Utilization of the Resources of the Sea</i>	by S.J. Thrower and D.G. James	101
<i>The Sea and its Resources as an Ecosystem</i>	by Dr. Alistair J. Gilmour	113

Tables

1	Areas of major physiographic features of the world's oceans.	41
2	Offshore mineral deposits.	42
3	Major element composition of offshore phosphorites.	51
4	Average composition of manganese nodules in the Atlantic, Pacific and Indian Oceans.	55
5	Average metal content of manganese nodules in the Australasian region and surrounding areas.	56
6	Average composition of deep sea sediments.	57
7	Average trace element content of deep sea sediments.	58
8	Average metal contents of bottom sediments in the Atlantis II Deep.	58
9	Compositional range of some hot brines.	59
10	Seismic surveys - Bass Basin.	69
11	Drilling - Bass Basin.	79
12	Utilization of the world fish catch, 1972.	102
13	Approximate water activity values below which growth of organisms does not occur.	103
14	Comparison of the chemical composition of raw fish and fish meal.	107
15	Yield of minced flesh and fillets from some Pacific Ocean species.	108
16	Principal Australian imports of marine produce in 1972-73.	109

Illustrations

Figures

1	C.S.I.R.O. subsurface oceanographical stations occupied during 1960-1973.	16
2	The surface temperature ($^{\circ}\text{C}$) in summer.	18
3	The surface temperatures ($^{\circ}\text{C}$) in winter.	18
4	Dynamic heights ($^{\circ}/1000$) in dyn. cm in summer.	19
5	Dynamic heights ($^{\circ}/1000$) in dyn. cm in winter.	19
6	The surface inorganic phosphates ($\mu\text{g} - \text{at./l.}$) in summer.	20
7	The surface inorganic phosphates ($\mu\text{g} - \text{at./l.}$) in winter.	20
8	The surface water masses and their $\text{S}^{\circ}/\text{00}$ - temperature relationships in summer and winter.	21

9	The surface water masses and their mixtures in summer.	22
10	The surface water masses and their mixtures in winter.	22
11	The mean annual curve of surface temperature and salinity off Maria Island.	23
12	Vertical profiles of temperature in relation to phosphate and nitrate surface values at the Maria Island Station and a deep station offshore.	24
13	The long term trends in mean annual values of 20 m temperature ($^{\circ}\text{C}$) and salinity ($^{\circ}/\text{OO}$) at the Maria Island Station, 1946-1972.	25
14	Bathymetry of the oceans.	40
15	Schematic representation of the structure of the continental margin and adjacent ocean, and the location of mineral deposits.	41
16	Vertical extent of offshore mineral deposits.	43
17	Some offshore mining methods in use at the present time or likely to be used in the future.	45
18	Pleistocene sea-level changes.	46
19	Location of some offshore mineral deposits.	47
20	Offshore phosphate deposits.	50
21	Distribution of manganese nodules and the rate of sedimentation.	54
22	World-wide offshore petroleum exploration.	66
23	Australia-wide offshore petroleum exploration.	67
24	Schematic diagram of drill ship and drilling assembly.	71
25	Well locations - Bass Basin.	78
26	Rate of increase in population at varying population levels (after Schaeffer).	84
27	The theoretical relationship between the steady state catch and fishing effort (after Schaeffer).	84
28	Stock and recruitment relationship. Recruitment is independent of population size except at low levels.	85
29	Total revenues, costs and sustainable yields with respect to effort (after Christie and Scott).	86
30	Catch and effort for the Tasmanian southern rock lobster fishery (1941-1973).	87
31a	Catch and effort - Tasmanian abalone fishery 1965-1973.	88
31b	The same, but for Zone 2 only.	88
32	Catch and effort for scallop fishery in the D'Entrecasteaux Channel 1934-1963.	89
33	Annual landings of scallops for the main areas fished in Tasmania.	90
34	Schematic diagram of a fish-meal plant.	106
35	Schematic diagram of a process for manufacturing comminuted fish products.	109
36	Sketch of the current systems of the western South American coast showing the distribution of the Peruvian anchovy (<i>Engraulis ringens</i>).	115
37	Cross section of the western South American coast to show the generalised structure of the currents.	116
38	Annual catch of the Peruvian anchovy fishery for 1965-1972 showing the occurrence of <i>El Niño</i> conditions.	117
39	Estimated population of <i>guano</i> birds on the islands off the western South American coast showing the occurrence of <i>El Niño</i> conditions.	118

Plates

1	Portion of a phosphatic pavement from off the eastern Australian coast.	52
2	Phosphorite nodules coated with a calcareous veneer; sample off the north-western Tasmanian coast.	52

3	Manganese nodules from the Southern Ocean.	55
4	"Ocean Digger" drilling rig.	72
5	Sketch of deviated drilling into oil reservoir.	73
6	Diagrammatic sketch-production platform.	74
7	"Kingfish A" platform in 77 m of water, 76 km offshore in Bass Strait.	76
8	Midwater culture of <i>Crassostrea gigas</i> .	96
9	Hatchery experiments with <i>Pecten meridionalis</i> .	97
10	Experimental <i>Mytilus edulis</i> culture.	97
