My dear Walker

I am obliged for the newspaper containing Clark's notes on a Tasmanian skeleton which are interesting.

With this I am sending you one packet ^{of} made up containing circulars & one book packet of open circulars. Will you kindly distribute these where some result may be expected.

I could not put Dr Clarke's name on the prospectus as he has not done any ^{work} directly for the book. I am of very glad that my suggestions to get the skulls measured was taken up by you & that you induced him to take the work in hand, but the measurements were first published by the Roy. Society of Tasmania & not in my book. Dr Garson's name was put on the Preface because his measurements were first published in my book. I trust you will see the difference. of course Clark's notes will appear in the book.

I am very glad to hear that
Mr Morton has been so success
ful with the Government & that
I may expect the maps before
long.

Any notes you may be able
to send will be acceptable.

Yours very truly
Chas. L. Roth
