5th Month 1836.

The second applicant of the Lancet. 

The appearance of the leprosy in the back part of the body has shown 6 sick of leprosy. 

This being the 18th day since rice was not affected, the scales began to fall. 

The third applicant of the Lancet. 

The leprosy was not much affected by the rice. 

The leprosy became smaller. The leprosy healing. 

Recommencing the rice. 

19th. 20th. and 21st. rice applied. 

Nasogastric. The third applicant on the day of complete recovery. 

None lost appetite. parade much in pain. 

ague. 

reduce a little every night on the musk. 

The musk became smaller. The leprosy healing. 

Recommencing the rice. 

T meeting the leprosy. 

Serious. 

Recommencing. 28th. rice for effect on. Repeatedly. 

Sick in the leprosy particularly on eyes. 

It at night is troublesome. 

on 2 or 3 days. To be obtainable to be taken up in bed. 

Complaint. 

set up for 2 days. 

leprosy of the tongue white all over. 

in the tongue. 

eyes. 

small. Bowels much hurt. 

had 1.7. 

was. 

to music. 

9.50. 

1st. 

never. 

26. 

1835. 

Died not active enough. 

the last day. 

been much annoyed by yellow coat of 

skin. Was not within so much. 

other symptoms same.

and brought cattle with. The Weather fine.

Last Thursday he did set down in
the bank some time, burning salt. On going up hill to day down the weather getting
so a Day came behind there. The being Frighted look behind there showing them the cattle
perhaps the Pite Rush now since then he has been difficulty in making
for a Dr. I went to Dr. Ferri with a few Doses of Dr. Pottmann and
about a foot breath preserving that a cattle down the bottom being
destroyed. There a large, this fall in some 2 l. V. on Dr. 4 or 5 times a Year
of Rush & very come out & has a contract of little water at
both ends he says the rush made was three times as long. the head 50
or 2 or 3 small times 6 or more than a small fir, preserving this. This came
there I found the hoary pappoos dotted by a large cuneus. 20 or 3 days
the weather to the North past preserving its own & the north of the tor the
this & another smaller were kept the fall. Day they were cyturried 24
formed round pieces of the Rush

Had been complaints for several weeks previous about her commencement of illness but for 3 or 4 days in the time previous her face was very much distended, had swelling together with stiffness of the extremities. Sometimes prostration of her appetite, she had received considerable alteration in the beginning of the illness she was seized with severe fever, of a low chills, by the 12th of July she was taken very sickly, she was slightly less off with fever, but rather more off with mouth had very much toothache, she was very weak, her face looked considerably, the former we had some time before thought she was recover, but she seemed to recover her strength, after day, presence to her death the symptoms increased considerably, Jefferson went to assist until her death took place.

On taking the body about the 24th of July, the veins were very full, the skin yellowish, we attended the stomach was rather very cartilaginous. The brain was stiff to the touch, with its right side much more forward in the right side, the lungs black & thick as crepes, at upper part of the brain found one or two loose dark spots were taken. The liver much enlarged, and not much consent of the liver much, the body was soft and its anterior surface had a little yellow, small white grains forming, the liver in every direction of them, extended in both directions and was yellow. The liver was full, the right side, the right side, liver was extended in both directions, the abdomen was of a white film of calcification, structure, the body much distended and the surface nearly covered.

**Remarks:**

Catarrhitis has prevailed in all families in the district, particularly in the parish of Influence. This month has been very dry, the suspension of rainfall has been very heavy, and the crops are about the end of the month, but crops are not yet ripened.

Kerley, Al. Operat. viij
11th Month, 1836.

I certify that Private Michael Goodwin of the 21st Sect. has been for some time suffering under an affect of the face that his case requires more attention than it can have at this station. I therefore recommend his being sent as soon as possible to head quarters.

I certify that Private James Golden of the 21st Sect. has had an affection of the throat some considerable time past which not inducing illness is in a state to return to the station. This place not being proper for the further treatment his case requires there being no hospital here for his reception. Recommend this being forwarded to the nearest station as soon as possible.

28th

25th Probation, right with all.

29th All well.
