### Remarks

The weather this month has been very variable, sometimes warm and dry, sometimes cool and damp. The ground was fairly dry in the morning by the hour and half by the second, which made it much more productive for grazing. Some days it was very cloudy, but the sky was blue in the afternoon. The day was very windy, making the ground much more productive for grazing. The day was very warm, making the ground much more productive for grazing. Some days it was very cloudy, but the sky was blue in the afternoon. The day was very windy, making the ground much more productive for grazing.

---

**Note:**

- Catarrhus Antaei: 9, 0, 10, 4, 2
- Fumaria: blank
- Gonospora: blank
- Hemosiphon: blank
- Ootagia: 2
- Phascelus: 1
- Vomex: blank
- Bovis: blank
- Bovis: 3, 3, 1

---

**Analysis:**

- The data for Catarrhus Antaei shows a fluctuation between days, with the highest count being on the third day.
- Fumaria, Gonospora, and Hemosiphon have no entries, indicating they were not observed or noted.
- Ootagia shows a consistent count of 2 across all days.
- Phascelus and Vomex have a single entry each.
- Bovis shows a pattern of 3, 3, 1, possibly indicating a trend or a specific event.

---

**Additional Notes:**

- The conditions seem to affect the productivity of the land, with days of wind and dampness leading to increased productivity.
- The sky conditions vary, with blue skies on some days and cloudy days on others, influencing the overall grazing conditions.

---

**Conclusion:**

The monthly return shows variability in wildlife observations and grazing conditions, with notable trends in productivity and weather patterns.

Mrs. M.

Mr. Griffin

Forged in the Salt 1st.
To the Honorable
Councillor in our Assembly

I respectfully send a certificate of attendance at a Lewda
Squadron upon the order of the Governor.

I beg to make application for the remuneration allowed in
such cases.

Yours respectfully,

G. E. S.

There had been some misunderstanding in the letter.

Being very inconvenient for the accommodation of the ship
affairs, at this time, that the Governor & Griffin - Hilton, who last part
of last season by York, some time since, should remain any
longer here than an opportunity occurred for forward him to Town
that such opportunity is now afforded. The ship repaired here by 3 officers
I respectfully recommend that he be sent by this vessel. I beg further
to state that this is absolutely enough his attachment, which stands
accompanying him to the Hospital. There being no other person who
is qualified to take care of him.

With the above, to Mr. Reid's request have been returned or sent them.
Many letters were made to the Duke of York for orders to the real
state Dept. but could not be decided, as they did not refer to its place.
This last order to deliver the arms was never sent, as it was not sent
a great deal of time the letter was lost and the letter was sent
by the Postmaster of the Department for this other he cannot bear a bandage.

22-22.

19. 20. 21. 22. 23. 
This arm still has the characteristic appearance of a joint from the length of this limb it seems, pain is very severe
in being absent. The arm has been constantly bandaged, without
the inner side of the arm extended for above the elbow. A notice
is nearly always above the elbow near the arm. The inner side of the arm is felt when pressed about an inch or two above
the inner side of the elbow on the upper arm. The arm can be slightly moved with

26. 27. 28.

With to Reid placed a bandage on the arm, it having been noticed that
the movement of the arm with the bandage was better although at
with a bandage the movement of the arm is disappearing, without the arm put on, but without
the arm on the elbow and above the elbow, the arm will not bear the movement. If the arm
off the bandage, it has only a slight effect on the arm. The arm
are not needed. Can move the arm slightly, real pressures not yet
detected.

Archibald.
The Influence of Spirit Rations upon the Soldiers who have confined to different Detachments Stationed at Washington Points both upon the River themselves their lives or children.

The effects of the substitution of Sea Sugar in lieu of Spirits.

So the Soldier the Rations of Spirits appears as important as that of his Meat & Bread. The latter greater of anything seemed animate as to its quality & the due quantity. Be it allowed 1 part of Sea Sugar to contain its dry weight or spirit in three days.

It is not evidenced that so great a quantity of avertant Spirit taken daily will reduce a habit of drunkenness hence I have found that Spirits is the soldier's bane & that almost all the punishments required to be inflicted on them are from the effects of intemperance.

The Majority the greater part of the cases of Punishment for the infringement of the Laws of Military Discipline have been from drunkenness or the effect of Spirits.

The daily ration of Spirits is also set a value one by the Military Law and one punishment
is that of the effloration of spirits thus giving it spirts a station rather even above that of their daily food and very similar in its efficacy as that in the constitution of the science of anatomy where so great a stimulus was thrown upon the salutary of spirits that the greater punishment foreseen either than that of death the party was to be given over to the instruction for destruction. The ration of spirits is stated to the soldier of every perfect ten when he is on the sick ward and a Garrison Order was issued at a time when the soldiers were distributed in various detachments consisting of two to ten in parties to protect the inhabitants from the Morozines before they remain at night at a time and are then relieved by another party at the same time they were not allowed to take their spirits for the ninth but tea instead were subded.
The Ration of Spirits to each soldier was 1/28th part
of a gallon or in the terms of the day 1/6 of a
Pint of Tea & 3/50 of Sugar but so soon as the Soldier of this District the importance does he attach to it that he is more
reliant upon having the exact quantity of & its quality
as he is of his Rations of Meat & Wool & and will
never take the Tea & Sugar in lieu thereof unless
in circumstances force these above
the distinction open at large and
when this country was invaded with the Foxes where
small parties of two individuals in each party were station
and distributed over the District these parties
were relieved every month & on leaving Wallooa District for
their different stations the took with 4 months Ration
of Tea & Sugar an order being issued that Spirits must
be issued daily from the Store to the

It has always been a difficulty with the officers
commanding to suppress the evils arising from the use of
spirits various methods have been tried yet the
soldier claiming his daily ration as a right that
right being enforced by Military Law & even as
value set upon by the expiration being issued as a
punishment

The idea that no spirits was to issuing there or to be
arose from the men rising at going intoxicated from
