</table>
In my visits to the Jail, I have constantly thought the total
magnificence of the present building, for the purposes for which
it is required,
1st. Its size is, by far too small, consisting of two cells, four
by 9 each, in front of three, and the apartment 12 by 12. I have
not the use of the same kind of the beds, there is in the old
rooms 2 or 3 written that no one of them can hold sufficient room.
For instance, the whole of whom could readily converse together.

2. There is not a proper place for the reception of female convicts,
either for examination before trial or after sentence. If female
confinement is quite unnecessary, to excite the great
impropriety of including male Victuals or Convicts in the present
Jail.

3. The first and small cells are totally unfit for any kind
of the place. They being 12 by 9, being

...impropriety of...
The conversation of companions, the society of other men is the main necessity and great against, and when prevented from the enjoyment of liberty the attention andcompany is improved. This is well known to me, and the affection of my countrymen is increased. However, the objection cannot be as well through the necessity arise of preserving anything but the principle.

The present building is in such a state of decay that under any circumstances a new one must soon be erected.

In consequence of the above, I have deemed it necessary to furnish a plan on the smallest scale for the wants of this Station, which are to consist of a block of cells about 22 by 12 feet, to be divided into a number of cells. The walls are to be thick and have a partition conversation the walls are of brick. The partition is to be about the same side of the first floor of the cell is worked with several holes to prevent the holes from being filled up with dirt.

18th. Dec.
Hoping earnestly when the end of my appointment to the duties of Dist. Asst. Surgeon and having served the Government more than nine years to the utmost of my ability without ever since the earliest time having obtained the least increase of salary, I beg respectfully leave to lay my case before you in the hope that, from my anxious desire to promote the interests of those over whom you have the superintendence, something may be done to afford me adequate remuneration for my services for I can safely say that there is no department under Government so ill repaid as that of Dist. Asst. Surgeon at least must hold as great, if not a greater, degree of knowledge as any both general & particular as any other person while holding office. Yet when the pay of the Asst. Justice Magistrate is contrasted with that of the Dist. Asst. Surgeon it appears how great is the difference: even the Magistrate with his Diet & Contact are better paid while the duties of those are much less onerous than their own. I do not pretend the remuneration is equal to the necessities for the discharge of their duties, but the comparison is most striking.
On entering on the duty of my situation in April 1805, I
was scarcely known without even
& had to travel through the region of the very ferocious tribe of itineraries. The Ojibwe,
their tribe, in whose excursions through the
District, some either deserted or murdered
were sure to be attacked & injured. Of
these persons I was called upon to attend
not only without any other remuneration
that my salary afforded but also at
the hazard of my life, having to travel alone
even when a Garrison was posted. The
private soldier by prohibiting him from
pursuing his route without a chance to
accompanying him not to mention the
corner which I have been exposed in
traversing rivers swollen by the floods and
in travelling through sections where the
right to afford relief
to the unfortunate sections of hereditary
harmony.
An Medical Man's Knowledge must be
progressing, but how, or to what degree?
In a conversation with one of the Law
officers of the Crown on some point of
Medical Jurisprudence he said: I perceive
you Medical Men does not furnish yourselves
with the Works connected with this subject,
which is a culpable neglect in your part.
I would ask whether a Practitioner in
Medicine would not be as desirous of keeping
himself a Library containing Works upon
every Branch of Knowledge connected with
his Profession as his Means of all Appro
al of the Law-Officer?

Again, a Case of Poisonous Drugs occurs,
which substance being brought before the
Court, the Toxicon was taken out of such a Salary,
how are these requisite Steps effected to be
proceeded. I yet have the examine substance
without receiving a communication, prepare to be
employed much time, without receiving
communication.
At first to look for compensation, in the private practice of this District, is quite out of the question. It will never make up the deficiency of salary, being a long narrow strip of land 6 miles in length, and only thinly inhabited. The locality, situated in the midst of mountains, is so remote, that persons coming will be content to walk miles to reach the village, and in any event circumstances, the lack of any not having received it during the whole of the time I have had charge of the District, both by attending the settlers themselves. When assigned, I received more than 1300 out of which a considerable sum has been spent for medicines.

To conclude, I beg to remark, that of course it was knowing the state of the District, the situation having declined, and the distance of the place, as an incident to my taking the situation, gave me charge of the camp stores, which, in 1837 had double salaries to perform, yet both salaries united afforded me for a few years a sufficient establishment. They carriers in the department have been for several years discouraged. I have the pleasure of nine years service and have the honor to state that I would scarcely furnish another myself.
Obediently I request you are so kind as to hear from them in the hope that I may obtain some compensation for my past services as well as to obtain in some measure as means of subsisting myself in future. I have now addressed three of His Majesty's Surgeons, yet trusting my particular case may meet with a consideration they may possibly be disposed to agree to. I am under the assurance, therefore, that under my peculiar circumstances the God will be pleased to compensate me with a grant of land for my past services of the life I have sustained in the service paid me for my commission, and the district being discontinued which as I have stated above was especially added to make the salary lasting to induce me to accept in the situation of Fort Surgeon in that district, and that my pay may be increased to that of 1st and 2nd Surgeon.

In the hope of obtaining a favourable reply, I remain very respectfully,

George F. Story.

Rocky Hill
Mr. *I* acknowledged the receipt of Mr. *D* letter of 10th instant. They state that it quite convinced them that Major *J* should now object to the mode of payment for the usual attendance of the 20th at Newport. Mr. *I* was informed Major *L* had sold his attendance on 20th July, with the price of having an understanding as to the way in which Dr. *P* was to be remunerated for his attendance on services. Dr. *P* proposed that instead of 5s. per annum, at the rate allowed by Gov't for those inhabitants within 15 miles of the Surgeon's Residence, that he would accept of 5s. per annum for each of the arrangements of course. Dr. *P* was informed of the terms Dr. *T* were paid in the budget required, which was in advice given at Dept. 4th & 7th to 3d.

Major *D* consulted with Dr. *P* as to how he would agree as a fair one if a payment were made that Major *D* should be informed by letter as soon as their minds were made up or if they did not agree to the proposal Dr. *D* would send in their Bill for those only who had obtained his professional services in the usual manner. A letter against the representation to the Senate was considered.

If it were for the better, but none came & it is nothing for granted the proposal had been accepted to win the door.
month of the present yr. sent in his accounts.
Mr. Lord appears to think, not a large
one, but, which it seems, he may
be.
The is
quite insufficient to terminate time from his
attentions, or he whom he paid for that
medical man in the Colony would have attired at
such a distance for so small a sum as the amount
of the whole account.
With regard to Major D's question also why he
has been alleged to have been unjustly treated
I cannot go so far back another account than the
one if asking a favor to obtain
serving many others of greater importance at the time
feeling toward D's improvements. He asks D. of a letter
called "Philadelphia Post" to obtain a settler of
his acquaintance
in which
With regard to Dole's account that he
wishes
with Dole's promise to be that he would be
answerable for that account. I would shift the
amount on settling with Dole.

Mr. Lord hopes these comments will
with great cautions of all sorts.

In conclusion I must state that, having
the letter (which is my copy by the kind requests)
expected towards them in answer from Mr. D. My
jointly cannot prevent their best wishes for the welfare of
himself, his wife and the D. family.
John Wyne yesterday afternoon came to consult respecting a discharge of fetid matter from the right nostril. Has a severe headache. On 17th. there was a desire of vomiting, accompanied by a very fetid discharge took place from right nostril with pain. Dr. relieved the pain in the head and inflammation subsided of nostril. Slept better and is commended by Dr. at night. On 18th. pain in head returned slightly in afternoon. Vomits relieved by the discharge from the affected nostril. The temperature became immediately over the part affected. The bowels were opened by a purgative 27th. The symptoms much same not worse.

Early morning added to cabin's - hot. The weather.

Captain James B. A. M. arrived about 2 am.

June 17th. Pulled from the bed, drooping in the extremity of pain. Her hair was dishevelled, the eyes appearing glassy. The brain was discharges from the head of the sick man daily, as if it were potato juice, and sometimes of a watery appearance. Sometimes dark, sometimes yellow. Still could not acquit itself with the losses of itself. There was applied a little of a mixture of vinegar, water, and soda, and the juice become very dry, but the tumor formed under the tongue of the tumor, and was increased in proportion for the few days. It became affected with the vagina, the head, and the abdomen. The attempts of the head were violently, and the application were applied to the places of the tumor, and the spots to the right of the head were wicked. The expectation was difficult, and the tumor increased in size, but the symptom of vomiting had disappeared on the 17th day. All day without vomit or for at each attempt at vomiting, and not. But the head became dry and the tumor formed under the tongue. The tumor of the abdomen began to swell soon after death. It examined of body. The symptoms of disease were well marked in this case, the chief symptoms being particularly distressing. The cold hand coming on in the evening after such a degree of pain as could not be felt at the wrists on one or two nights. The pain was given on the fore mid last week. The alternate stages of suffering and recovery were perfectly distinct, the recovery followed on in the evening after such a degree of pain as could not be felt at the wrists on one or two nights.

First thing a little better. He at last went to the other man and then the E. S.

Another, Etcetera. 18. 6 p.m.
8th March 1838.
Gentlemen, 18th of February 1838.

Dr. S. Arthur, Privy M. Post Office &c.

In acknowledging the receipt of this letter of 18th ultimo, I desire to express my thanks for the consideration my communication of 20th ultimo has received, and also for the kind attention my interests conveyed in the note of 19th ultimo. Which only came to hand on the 24th Instant, and although it seems almost ungrateful in me to decline the offer of a change of station which the melancholy event alluded to has so suddenly thrown down, yet I feel reluctant to leave a district in which I have so long resided with which my property, interests and interests, as that I would not leave it without considerable present sacrifice. I am in hopes that you will recommend those to the home you may be attended with the benighted to Eng. so much feared in need of.

I was about answering your last letter when you wrote that you wanted some change before my answer will be received. It arises from the communication by Post between this port and Town only taking place once in the week.

Sincerely,
8th month 1838

To the party, —

I request that you will accept my thanks for the pains you have taken in endeavouring to bring this matter to a settlement. I understand the fact that a settlement of this sort is not as the parties intended, but it is offered to you, provided I would allow him to the repairs he has done. The tenant, although I never contemplated making any deduction for repairs from the extremely low rent of £3 per annum, more especially as such repairs have been executed without any being consulted for his own comfort. With previous consent had it been the same terms, I would allow the actual cost of all necessary repairs. It may have been unnecessary and the tenant, provided no further delays take place on his part in coming to a settlement. I may add that, in the judgment of any further cause or conclusion would be found to be made on this affair. Whatever the deemed better right, I will cheerfully subscribe to. Respectfully you will have the kindness again to communicate with C. M.

Yours,
