Hastings, Oct. 13, 1875.

Dear Sir,

Your promissed [?]

Muller's work in time.- I enclose a specimen of glass, which your friend Dr. Swann lost. It is strange that near 100 years have elapsed since that glass was discovered, and yet, the person who has written in the History of Taxonomy has been described as the person who was obbliged for securing it tight.

It is described in a book written in Cook's Voyages, by the botanist who explored it.

C. R. H.

[Signature]
May Aitchison, now resident at your
is descended, if you could
obtain for him a few
plants, before the season
returns, as I am assured to forward
him at Christchurch, New
Zealand, by the Director of the
Botanical Gardens at Christchurch.

has been very liberal in his
contributions to the Botanical Gardens
there. He has lately sent us 87
new families of Leucemia from
the South American Alps, all of which.
Arrived in good order
if you would wrap them in a
small box, with a little nesting
material, such as tow, same as
in the letter. I am venturing to
send them. Dr. Mead, who is the
same as the first letter. I am
writing off-hand.

I hope to visit Connecticut in a
few weeks, and can then
send them, if you think they
will be too late to travel back by
steamship. Each, all of which,

From yours truly,

A.R. Davies

Anderson.

Swansboro

My apologies for being so late, you are in December, if you could obtain an annual fee for your fruit, plants, before the season arrives, as I am renewing my order from the Chamber House New Zealand, as the curator of the Botanical Gardens at Contoocook, has been very liberal in his contributions to the New Garden. When he has lately sent me 12 new species of basket from the southern Alps, all of which I would love to share with you.

Arrived in good order
if you can hack them in a small piece with a little salt water. I fear in the treatment and handling by one of the trucks, I should feel relieved.

I hope to visit Swansboro in the summer, but it would mean living too hot to have plants here.

Yours faithfully,

H. R. Davies

Next season
