

Wilmourne

8/1/75.

Allow me to ask you,
dear Dr. Story, whether
you have the enclosed
Scirpus (*S. flaviratilis*
SGray) in water fresh
or nearly so at your
place. It is not *Scirpus*
maritimus. It is
larger, has a triangular
pointed fruits and
longer setae.

Trusting that the new
year will be to you one
of happiness and health
I remain your respectful
J. J. von Mueller.
