

Milbourne  
Catan Harris  
29/8/71

I am not quite  
certain, dear Dr Story,  
whether I acknowledged  
your kind sending of  
glusmaral. The amount  
of writing in my de-  
partment is so over-  
run, that my friends  
must be charitable, if  
shortcomings occur.

The "Westwood" is  
Impetrata arundi-  
nacea (Grillo). It is  
accidentally omitted

in Dr Hookers Flora  
Tasmanica, it being  
recorded already in <sup>Whom</sup>  
prodomus

I was glad to learn  
that so much atten-  
tion had been shown  
to the Mess. Sullivan  
in your district.

Let me hope, my  
revere friend, that  
your health is as  
firm as your spirit  
is bright and happy.  
That is the wish  
of your attached friend  
Baron Von Mueller.

Plants from Dr Muller. 8/7/1

3. *Cinchona officinalis*  
planted on Sugarloaf Petre

1 Cork Oak

2. *Asani* Tea

2 Chinese Tea

3 *Deodora*
