

TASMANIAN DOMESTIC ENERGY DEMAND PROJECT

1980 - 1982

This survey project was conducted by A.J. Finney, D.W. Challen, P.A. Gunn, R.P. Rutherford and P. D. White and funded by the Tasmanian Energy Research Commission. Its aim was to establish the current use and possible future directions of all forms of energy use by households in Tasmania and examine the role of energy conservation through a survey of households.

These working papers include: outline of project aims 1981, correspondence, survey drafts, notes, questionnaires and some replies, interviewers' instructions, copy of minutes (1982), pattern charts, fuel studies, oil, Hydro-Electric Commission, gas, building studies, energy analysis, Environmental Studies Department project reports, population data.
