Easterday, 1867

This day, dear Mr
 Torrey, I learn from
 Mr Will. Hodge,
 that you most
 generously intended
 your kind offer to
 collect ^{material} ~~material~~
 for my ^{scientific} ~~scientific~~
 works. I accept
 this aid with the
 utmost of pleasure
 especially as I have
 absolutely nothing
 of ^{Museum} ~~Museum~~ plants
 from Freyrements ^{Freycerets}
 peninsula or its

07/00

vicinity, though
I have many plants
from the Western
Mountains, Mount
Laprynae, from near
Robarua & Lamerton
& Georgetown.

Engaged as I am
with the President
of the L.S. on an
universal work
on the plants of
Australia, of which
3 volumes appeared,
I am anxious to
introduce the plants
from your vicinity

now from them
being as yet re-
corded. You could
I greatly oblige me
therefore, if you
fill any old papers
you have with any
plans in James
& Grant, from a
memo up to the
Encyclopaedia! Nothing
will come amiss!
Your name will
always be recorded.
Any entry I can
at once publish
in my Journal
of which the 6th vol
is in print

Algae would be
also welcome. For
altho' my late ce-
lebrated friend
Prof Harvey cultivated
so much, we are most
eager to record new
localities. I shall
gladly reciprocate
for any gifts. Mr
Robson says there
an opening exists
for a medical man
in your vicinity. I
will ask Dr Murray,
a very superior
man otherwise (now
out of England) to
place himself in com-
munication with you
in regard to the
fulfillment
