

c7/81

Sunday 24/4/90.

Your most kind letter,
good and dear Dr
Storr, has given me
great consolation.
You speak with
as much piety as
philosophy, in both
of which I can learn
much from you.

Let me hope, you
are well, and that
you do not incur
unnecessarily the
inclemencies of this
wet autumn.

I have not yet
overcome my domestic
mental difficulties,
but my prospect
seems to be brighter
again.

¹⁶⁶⁴
The Potamogeton
sent by you without
flawed & pure be-
long to the series
of P. natans L., com-
mon in Britain. Your
the Australian species
has never yet been
carefully compared
& studied in all its
stages.

6135

The *Myriophyllum* cannot be determined without flowers and fruits. It seems however *M. variifolium*.

6135

The *Myriophyllum*, named after me is generally a much smaller plant and grows in blackish flats.

6193

The 2 other plants are *Stricaria dichotoma* Labill. and *Spiranthes australis* Link.

(1559)

I will be happy to give Mr. Schott, when he comes here, also the plants for you.

With best regards
your attached
Gerrard Muller
