

18/8/69

Time come time, dear Dr Story, I owe you my acknowledgement of a kind letter you sent to me already in June. The beautiful little orchid, enclosed in your letter, is a species of Chiloglottis. I have to work on several rare orchids soon, and will enclose yours in the examination. It is very kind of you to wish me to visit Swanport, and if at any time I can accomplish it, I will not deprive myself of the pleasure. It will afford me much pleasure to examine the plants, brought by young Mr Meredith from N.Z, if a numbered set was forwarded to me, your search for water plants, including even the little Lemnas, is likely to give us some new plants for Tasmania. With kind regards

Furd. von Mueller

Let me hope you are quite well.

[The reverse of the letter includes numerical jottings in pencil]
