

Melbourne bot Garden 29/3/70

Let me hope, dear Dr Story, that you returned safely to your patricarchic home, and that in the rural tranquillity of your salubrious country you ~~are~~ ^continue^ strong and happy.

Should you pass any sedges and reeds and grasses pray pick them all up for me, as I have to work on them this winter for the flora (the 7<sup>th</sup> vol.) [page break] Many of the grass maniorn [?] Glumaceae are not yet at all well understood.

If I can send anything from here to you, it will be done with very much gra[tif]ication.

Your regardful

Furd Von Mueller
