

c7/79

18/8/69.

Since some time, dear Dr
Stony, I owe you my acknow-
ledgement of a kind letter you
wrote to me already in June. The
beautiful little Orchid, enclosed
in your letter, is a species of
Chiloglottis. I have to work on
several rare Orchids now, and
will enclose yours in the
examination. It is very kind
of you to wish me to visit
Swanport, and if at any time
I can accomplish it, I will
not deprive myself of the
pleasure. It will afford me
much pleasure to examine
the plants, brought by young
Mr Meredith from N.Z., if
a number of sets was forwar-
ded to me. Your search for
water plants, including even the
little Lemnas, is likely to give
us some new plants for Tas-
mania. With kind regards
Frederick Mueller
Let me hope you are quite
well.
