

VIEWS OF MOUNT WELLINGTON

**FINE ARTS COMMITTEE
UNIVERSITY OF TASMANIA**

Mount Wellington is visible from nearly everywhere in Hobart and it inevitably forms part of everyone's life. It has many moods depending upon the season, the light that falls on it, the mists that enshroud it, the foreground through which it is seen.

In arranging this exhibition, the Fine Arts Committee wanted to bring together a collection of photographs of Mount Wellington that would provide many individual interpretations of how the mountain forms part of the visual environment of our city.

The exhibition is the University's contribution to the Festival of Tasmania.
