Mails are considered to give nine hundred and twenty to the thousand.

920 of these single mails weigh 2 lbs. The Chomongers are

very particular. Seated a group of seven. This post, at it was more than a twelfth. Now if a thousand of the

single mails he counted, and they weigh three pounds, it

may follow that of 2 lbs. at 2 3/4 lbs. for that they

are about one twelfth. But which is not enough, and this

is considered so by the Chomongers, it is commonly paid that

nothing is full talk. These four tenacks, one hundred and sixty

shillings.

The Queen paint in case not as a good oil paint of a light

color, and I thought the best way to acquire of it would be to put

in some of our climate would be taken a sample out

here is not yet, oil can in the King which is that it goes best

in that state for when sent a long journey? But there is a brand

accompanied by a container Senate chased oil things to make

it. Respect only oil can of a light color which will stand.

The 6 Days of Watch. Springs are sent out on a sample basis

of cotton and felt, think that it may not be impossible the present

and other a gear to supply the watchmen in Robert Town.

I hope of a stamp of undated springs we now December the 20th.

If the best that can be done with them, as I suppose that is

not to be possible to change them away for some articles desirable.

For yourselves or acquaintance, even if the price we should be

well stocked with springs. There are good ones of the most

useful sizes, and if you are wanted we would undertake to send

by them. Thomas the thought of sending out a few watches by

bottle packed, boiling water, all London made, may be done? If

watches are sent at about what price? Perhaps soon watchs
The above expenses are fairly divided
and charged to the respective packages
on the other side, and they agree in
amount.

Seeds. All the Grass seeds are gathered late in Summer or early in Autumn, yet they and any other seeds are not brought into the market till late in the Winter. The reason of the delay is, that the seeds are put away dry, evaporating until the frost sets in to harden to prevent the gardener from working out of doors. As the last was a very open winter the new seed came late to market, so that I could not send them in the Spring. Also, the Mails were not up in time to go by then. There waited for the Mails had they been here I should have sent them either by the Wells in May. Some are very sorry for the delay as I should think you would like to have them (the grass seeds) in time to sow in Autumn, which I expect might have been the case in the Spring; as it just you conclude to sow in Spring, I hope they will arrive in time. If the you intend to lay down much ground on Meadows, it will not be proper to have this quantity sent out very early for a little time to come? The summer will also apply. I should expect to your clothing and some other supplies, such as for men do, which should he planted half-yearly. Think it possible to find a better market than I can, & may 80 in Cannhill. N.B. In England the proper seasons Goats seeds will be Spring. Corn is in Winter after nothing the Grass, seed in the Autumn.
