

DOWNLOAD OF PSYCHIATRY (DOP)

The DOP is freely accessible information on mental disorders and psychiatry, at about medical student level. It has the form of a general textbook, but may be of use to people with a specific question.

The DOP is copyright. Users are very welcome to print any of, or the whole document. However, photocopies for commercial gain are not permitted.

The DOP is a work in progress. It will be continuously updated and improved, in both content and useability.

Readers are encouraged to contact the author regarding typographical or factual errors, issues of disagreement, further suggested topics, or other matters.

I am greatly indebted to Désirée Fritsch for translating two chapters into French, Dr Ilaria for translating a chapter into Italian and Assoc Prof Petar Marinov for translating two chapters into Bulgarian.

Any other translations are most welcome.
