

DOWNLOAD OF PSYCHIATRY (DOP)

The DOP is freely accessible information on mental disorders and psychiatry, at about medical student level. It is in the form of a general textbook of 37 chapters.

The DOP is copyright. Users are very welcome to print any part, or the whole thing. However, photocopies for commercial gain are not permitted.

The DOP is a work in progress. It is continuously updated and improved.

Readers are encouraged to contact the author regarding typographical or factual errors, issues of disagreement, further suggested topics, or other matters.

I am greatly indebted to Dr Désirée Fritsch for translating two chapters into French, to Dr Ilaria Montagni for translating one chapter into Italian, and to Assoc Prof Petar Marinov for translating the entire text into Bulgarian.

Any other translations are most welcome.
