7th October 1847

Port

The Lieutenant Commanding directs the publication in Garrison Orders of the following Circular with its accompanying Instructions for the information and guidance of Paymasters and others in their public transactions with the Commissariat Department on this Station.

War Office

5th June 1847

Sir,

It having been represented to me that the repayments into the Commissariat Book, abstracted by the Paymasters and other persons, are so numerous as to give much needless trouble to the public Departments concerned in the adjustment of the said repayments, and that the number thereof might be materially diminished
by attention to the annexed observations.

I have the honor to request that you will issue such instructions as you may deem calculated to effect this object.

With a view also to simplify the record of advances from the Military Sheet, I have further to request that you will direct Regimental Accountants, whenever practicable, to avoid fractional sums of shillings and pence in their drafts upon the Commissary, except in cases of payment for the precise amount of stoppages for Rations.

I have the greatest pleasure in commanding the Forces of the Army in your hands.

The most numerous class of repayment is that on account of the balances in the hands of Paymasters and other Public Accountants, and it is considered with due care on this point such balances may be generally prevented, as for instance of the Accountant finds that he has over-estimated the expenditure, instead of drawing as a matter of course for the full amount
amount of his Estimate and subsequently refunding the surplus if his earlier drafts upon the Commissariat should be limited within the sum likely to be ultimately required in the period of his account, and his final Draft be for the exact residue, so as to avoid the necessity for any repayment whatever.

But as from unforeseen circumstances it may sometimes occur that the Accountant cannot so accurately adjust his Drafts to the expenditure as to avoid a surplus, he should immediately repay the same into the Commissariat Chest, omitting however fractions of shillings and pence in every case, except when such Surplus shall be the precise Balance of the Account for the period in question.

2° The amount required to be accounted for to the public under the three following heads, namely, Contribution for keep ing up of Staff Officers on board Ship at the Public Expense, Effects and credits of deceased Staff Officers, and Proceeds of Sale of medicines and Surgical Instruments could in future be deposited with the requisite Vouchers in the hands of Paymaster of any Regiment on the Station, to be credited in the

General
General State distinct from, but immediately following upon the credits under the same heads applicable to Regimental Officers.

3rd Officers making payment to the Regimental Paymaster under the above mentioned heads of Service are invariably to take his receipt, and transmit the same to the Secretary at War.

Par 4 The Inspector General of Hospitals having this day notified his intention of taking his passage in the next vessel leaving the port of Launceston for Sydney, on his way to assume the Medical charge of H. I. Troops in the Garrison of Gibraltar, as directed by the Military Secretary's letter dated Horse Guards 15th May 1827, and that he will be prepared to give over the Medical charge in this Command on the 1st Instant.

that these Instructions be strictly observed by Boards or Courts of Inquiry assembled at this Station.

General Order No. 132

Head Quarters
Sydney, 21st December 1847

1. Her Majesty having been graciously
pleased to appoint Major General R. B.
Hyndman B. B. to the Command of the
Forces in those Colonies as Main Force
in the Field, this Excellency this day
assumes the Command.

2. Having notified the arrival of His
Excellency Major General Hyndman B. B.,
it only remains to Lieutenant General
Sir M. D. O'Connell to express to the
Troops serving in this Command, the
high sense he entertains of the good
conduct and discipline which has distinguished
them.

It is a cause of no small gratification
for
to the Lieutenant General to know that, during no portion of the time through which he has held this command has the conduct of the troops, in all parts of it, been more calculated to deserve this commendation than at the present moment. The good conduct of the soldier is always a source of pride to his commander, and the Lieutenant General desires to express his grateful thanks to those, both officers and men who have enabled him, in taking leave of them, to speak as favorably of his service as he feels justified in doing of the discipline and orderly behavior of the regiments now stationed in these colonies.

The nine years which have elapsed since the Lieutenant General assumed the duties of the command have not been entirely eventful ones. He cannot but avail himself of this opportunity to congratulate that portion of the force which has been engaged in the harassing warfare of New Zealand on the favorable estimate formed of its services by His Grace the Commander-in-chief, and Mr. Government, as voiced in the honors and promotions accorded to it, and in saying farewell to the regiments which have been for some period under his orders. The Lieutenant General can only express a hope that they will continue to maintain the high character for orderly conduct and discipline which now belongs to them, and he feels certain that when called upon to meet the enemies of their country on the field, they will emulate the conduct of those
three Regiments who after leaving this Command, have recently so gloriously distinguished themselves in India.

The A. General cannot conclude without expressing his sense of the assistance which has always been afforded him by the Officers Commanding Corps and the Officers of the various Departments of the Staff, Commissariat and Ordnance.

So all he begs to tender his warmest thanks and he will ever entertain a grateful recollection of their support.

By Command of A. General Commanding the Forces in India.
